APPV grant projects in 2007

Title of the project: Oxidative stress and the comparison of standard and gene antioxidative therapy in in vitro and in vivo experiment

Principal investigator: RNDr. Martin Kopáni, PhD.
Project number: AVVT-20-003104
Department: Department of Pathological Anatomy, Comenius University Faculty of Medicine
Duration of the project: 01/2005 - 12/2007

Title of the project: Biological and medical aspects of the major histocompatibility complex in man

Principal investigator: Prof. MUDr. Milan Buc, DrSc.
Project number: SK-CZ-02806
Department: Department of Immunology, Comenius University Faculty of Medicine
Duration of the project: 1/2006 - 12/2007

Title of the project: Study of the long term effect of intraocular lenses on the posterior capsule opacification

Principal investigator: Prof. MUDr. Peter Strmeň, CSc.
Project number: LPP-0263-06
Department: Ophthalmology Clinic, Comenius University Faculty of Medicine
Duration of the project: 11/2006 - 11/2009

Title of the project: Evaluation of sialic acid expression and sialyltransferases – new marker of pathological changes in the thyroid gland tissue

Principal investigator: Prof. MUDr. Pavel Babál, CSc.
Project number: APVT-20-025204
Department: Department of Pathological Anatomy, Comenius University Faculty of Medicine
Duration of the project: 5/2005 - 12/2007

Title of the project: Application of magnetic and electric measuring methods in non-invasive examination of liver and heart

Co-investigator: Doc. MUDr. Ján Porubský, CSc.
Project number: APVV-51-059005
Department: Department of Pathological Anatomy, Comenius University Faculty of Medicine
Duration of the project: 3/2006 – 12/2008

Title of the project: Protection of the heart against malignant arrhythmias and heart failure

Co-investigator: RNDr. Peter Weismann, PhD.
Project number: APVV-51-05905
Department: Department of Anatomy, Comenius University Faculty of Medicine
Duration of the project: 1/2006 – 12/2008

Title of the project: Molecular mechanisms of the action of new substances influencing oxidative stress – an important ethiopathogenic factor of multiple diseases

Co-investigator: Prof. MUDr. Pavel Babál, CSc.
Project number: APVV-51-017905
Department: Department of Pathological Anatomy, Comenius University Faculty of Medicine
Duration of the project: 2006 - 2009

Title of the project: Role of bioflavonoids in prevention of the social stress-induced hypertension

Co-investigator: Prof. MUDr. Pavel Babál, CSc.
Project number: APVT-51-018004
Department: Department of Pathological Anatomy, Comenius University Faculty of Medicine
Duration of the project: 1/2005 – 12/2007

APVV grant projects in 2008

Title of the project: Participation of the central nervous system in monitoring and modulation of tumorigenesis. New strategies of ethiopathogenesis of malignant diseases

Principal investigator: Prof. MUDr. Ivan Hulín, DrSc.
Project number: APVV-00-45-06
Department: Department of Pathophysiology, Comenius University Faculty of Medicine
Duration of the project: 1/2008 - 12/2011
