

**Announcement for**  
**ONLINE EVIDENCE-BASED RESEARCH (EBR) TRAINING SCHOOL**  
**“Identifying a need for a new research study”**

On behalf of the Management Committee of the EVBRES COST Action (CA 17117), we are pleased to announce the **6<sup>th</sup> EVIDENCE-BASED RESEARCH (EBR) TRAINING SCHOOL – “Identifying a need for a new research study”**, to be held asynchronously online at CANVAS platform.

**Opening date: November 1<sup>st</sup> 2022**

**Closing date: December 31<sup>st</sup> 2022**

**The overall aim** of the EBR Training School is to introduce to participants the concept of Evidence-Based Research and enhance their ability to use existing evidence synthesis to justify and design a new study and place its results in the context of existing evidence to avoid redundant research.

**Structure and content**

The EBR Training School consists of two phases divided into 14 modules.

- **Phase I “Introduction to systematic review and the concept of Evidence-Based Research in healthcare research”**

It aims to enable participants to achieve basic knowledge about systematic reviews and the concept of EBR in healthcare research. It consists of 4 modules. Phase I is a prerequisite to Phase II

- **Phase II “Using the Evidence-Based Research approach to justify and design a new study and to interpret results from a new study”**

It aims to enable participants to achieve basic knowledge and skills in how to use the Evidence-Based Research approach to justify and design a new study and to interpret results from a new study. It consists of 10 modules.

Each module has specific learning objectives stated at the beginning of each module. The learning materials are in the form of video podcasts, readings, handouts and tasks.

**Learning objectives**

On successful completion of the training school, the participants will be able to:

- Understand the principles and importance of Evidence-Based Research
- Understand what a systematic review (SR) is and what it can be used for
- Know the principal steps in preparing a SR
- Find a SR of earlier similar studies
- Find a SR including the perspectives of end users
- Evaluate if a SR is up to date
- Critically appraise a SR
- Combine results of a SR covering earlier similar studies and results from a SR covering the end users’ perspectives
- Use the results from the two SRs to inform the design and justification of a new study
- Use the results from an updated SR covering earlier studies when interpreting results from a new study
- Be familiar with challenges to EBR

## Who can apply?

The course is targeted to Early Career Investigators (max. 8 years after Ph.D.) and senior Clinical Health Researchers who are interested in Evidence-Based Research.

Participants need to have a basic knowledge about clinical research methods and Evidence-Based Practice.

## Certificate of attendance

After successful completion of the course participants will receive the certificate of attendance.

## Enrollment

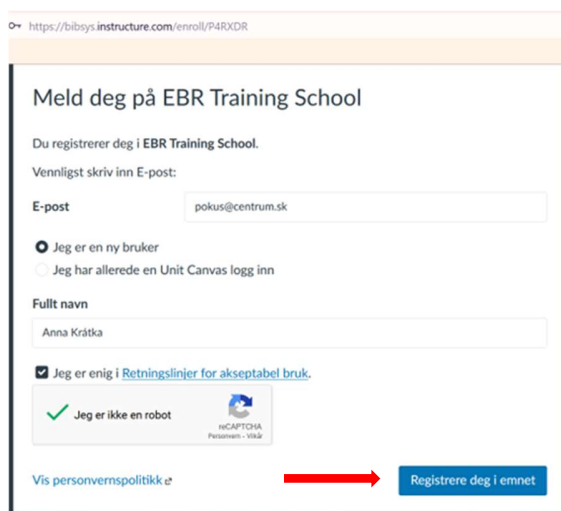

The EBR TS will run as asynchronous online course on the CANVAS platform of Western Norway University of Applied Sciences. **The course enables open self-enrollment.**

### Instructions for the enrollment:

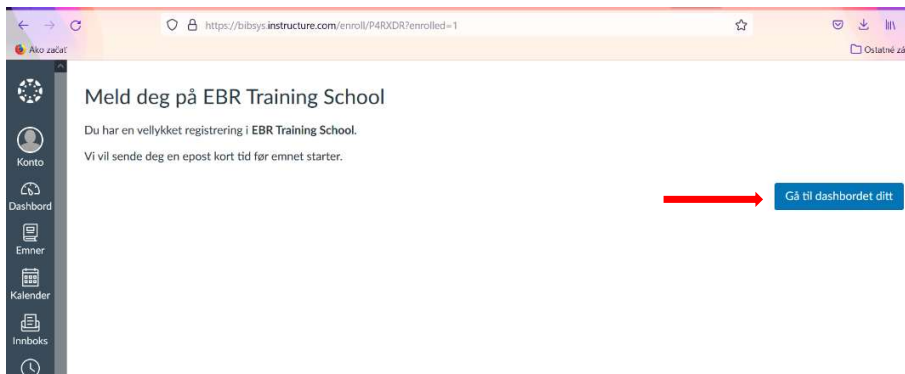

1. Open the self-enroll link <https://bibsyst.instructure.com/enroll/P4RXDR>
2. The instructions will be in Norwegian language; however you can translate the webpage if needed. Enter your email address (E-post) and click “Jeg er en ny bruker” (I am a new user).

3. Write your full name (Fullt navn), click I agree with Privacy policy (Jag er enig...), click “I am not robot” (Je er ikke en robot) and click the blue button “Register... (Registere...)”

- Click the blue button “Go to your dashboard” (Ga til dashbordet...)

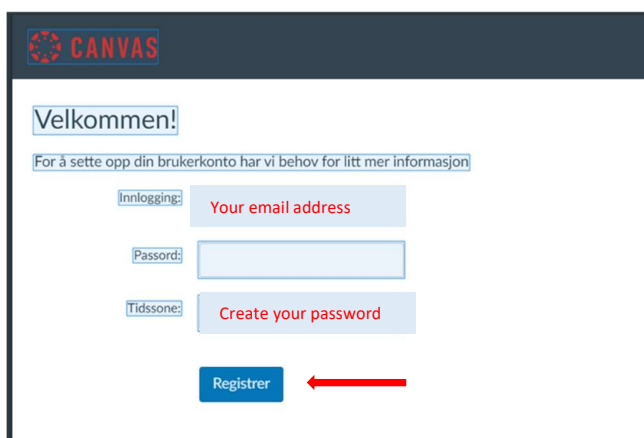

- Click the course icon “EBR Training school” to enter the home page of the course with information about the organization of the EBR TS and welcome video from prof. Hans Lund. The whole content of EBR Training school will be open **from November 1<sup>st</sup> until December 31<sup>st</sup>, 2022**

- To finish the registration process in CANVAS you must **confirm the registration e-mail you have received**. You will be asked to create your own password which you will need for the next self-enrollments in the EBR TS course.

[Klikk her for å fullføre registreringsprosessen](#) ← Click on the link you received by email

Takk for at du registrerte deg på Canvas! Denne e-posten er en bekræftelse på at brukeren Avam registrerte en ny konto på bibsys.instructure.com.

[Oppdater dine varslingsinnstillinger](#)

7. For the next self-enrollment use the same link <https://bibsyst.instructure.com/enroll/P4RXDR>, choose the second option "I am already logged in Unit Canvas" (Jeg har allerede en Unit Canvas...), enter the password you have created and click the blue button "Register..." (Registere...).
