**5. READ THE TEXT AND FIND THE SYNONYMS TO THE GIVEN WORDS.**

A 40-year-old man has been admitted to the emergency room. His medical history includes severe depression, treated with trazodone and fluvoxamine. On the day of his admission, at sunrise, his wife found him lying unconscious on his bed. She felt a weak pulse and shallow breathing. The ambulance came quickly to the patient's house. At that time, BP was unobtainable and his pulse was at 30-40 bpm. The patient was assigned a score of 3 on the Glasgow coma scale and required intubation for ventilator support. At that time, an asystole was recorded. CPR was started and 1 mg of adrenaline was IV administered. The patient was immediately transferred to our coronary care unit. Cardiac examination revealed normal heart sounds, no murmurs, gallops, rubs or clicks. The remainder of the physical examination showed a dry mouth, bilateral dilated pupils and distended bladder, without enlarged prostate.

- assistance - .....
- investigation - .....
- introduction/arrival - .....
- exhibit - .....
- appoint - .....
- two-sided - .....

- unavailable - .....
- senseless - .....
- demand - .....

**6. COMPLETE THE SENTENCES WITH THE VERBS IN BRACKETS IN THE CORRECT TENSE.**
